Routine donor consent at the time of organ procurement at the University of Pittsburgh. A policy prohibiting nondisclosure of consent for donation at the time of organ procurement (OP) was instituted at the University of Pittsburgh Medical Center. This study examined the effect of this policy on donation rates. OP was monitored prospectively for 14 months before and for the same 14-month period following implementation of the policy. Statistical significance was based on the use of two-tailed Student's t tests. There was no significant difference in the number of first-time donor registrations after the implementation of the policy (36 in the 12-month period before the policy and 31 in the 12-month period after the policy). A 5.4% difference ($P = .09$) in the number of new donor registrations was observed. Mean donor age increased from 43.2 to 45.2 years ($P = .11$) after the policy. The number of transplantation procedures performed during this period was almost identical (350 in the 12-month period before the policy and 348 in the 12-month period after the policy). Implementation of the policy prohibiting nondisclosure of OP consent did not reduce the number of first-time donor registrations or the number of transplantations performed. What's New in the AutoCAD?

Blending: When you run through a drawing, you might see a black line. Autodesk® AutoCAD® may attempt to “fix” an object that is partially hidden or partially transparent. Blending is a new visual enhancement for black-line objects that makes this behavior less obvious. (video: 2:11 min.) Fully customizable rulers: Draw customized rulers that suit your needs. Create custom rulers for areas and other geometric layouts. And use them in several ways—as drawing guidelines, working area guidelines, and advanced measuring. (video: 1:58 min.) Presets and Learning Mode: Take your productivity to the next level with the preset workflows you already use. You can now use them to get started in an easier way with AutoCAD or AutoCAD LT. And your favorite modes are now available on tablets and mobile. (video: 1:52 min.) Perspective: Bring your designs to life with perspective. With new controls, you can add depth and dimension to your drawings in real-time. (video: 3:16 min.) DesignXpert: Make your own pens and drawing tools with DesignXpert, a new feature for AutoCAD LT and AutoCAD. DesignXpert gives you full control over the material, size, and other details of your tool, so that you can easily tailor the tools to your workflow. (video: 1:50 min.) Vector graphics: Create more sophisticated drawings with the intuitive vector tools. You can import vector formats from Inkscape, SketchUp, and other vector programs into your drawings for precise control of shapes and angles. (video: 1:55 min.) Animation and collaboration: Show your designs to clients in real time, and enable them to provide feedback while you're working. Use the new Power View mobile apps to collect feedback and work together in real time. (video: 3:05 min.) High-performance 2D: Get the most out of your 3D experience with 2D tools. These new tools are based on the latest Autodesk® 3D technologies, including the GPU-accelerated Shingled-Mesh Tessellation (SMT) engine, and are optimized for larger files. Design and technical solutions: Create plans, drawings, and other technical documents
