Versions AutoCAD has been used for a variety of industrial design, architectural, and drafting purposes. The first AutoCAD release, AutoCAD 1982, was primarily designed for civil engineering, and uses its own file format, ACIS (AutoCAD Information System). The first commercial product, released in 1987, was AutoCAD Add-On Systems, a batch software development system. The first product for CAD professionals, released in 1989, was Revit, an integrated 3D CAD package. The first feature-rich product was AutoCAD LT, released in 1991, designed to run on Windows 95 on low-end computers. From 1994, applications including the first architectural product, AutoCAD Architecture, were available for users of all three platforms. In 1992, AutoCAD introduced the world's first 3D CAD system for architects: AutoCAD Architecture. It went on to become the world's best-selling CAD system, with more than eight million users worldwide. Since its introduction, over 2,400 AutoCAD add-ons have been developed, and the Add-Ons program has been expanded to include the AutoCAD Civil 3D line and the AutoCAD Electrical Add-Ons. I have a div in the header that I am attempting to keep animating once it is clicked and then stop the animation and just display the text once I hover over the div. I am having some issues with this and I'm not quite sure what to try. Here is what I am attempting to accomplish: A: Add hover animation to the header div. Then when hovering, display the content in the container: Name Content Javascript: function toggleContent() { document.getElementById('content').style.display = 'none'; document.getElementById('header').style.display = 'block'; } function show() { document.getElementById('content').style.display = 'block'; } See updated jsfiddle: A comparative study of the severity of liver disease, post-transplant survival and the risk of death in patients on the kidney-transplant waiting list. Severe liver disease can be life threatening and can lead to end-stage liver disease. Although liver transplantation is effective in ameliorating the poor prognosis associated with end-stage liver disease, in many countries there are insufficient liver donors to meet demand. A retrospective study was performed to compare the severity of liver disease and to examine the impact of severe liver disease on kidney-transplant waiting list mortality and post-transplant survival. The records of 877 patients on the Australian and New Zealand kidney-transplant waiting list were reviewed. Univariate analysis was performed using the Mann-Whitney test to compare two continuous
