WTF I needed to install Scunthorpe over again just to get Scunthorpe to work properly again. Anyone who tried to use Scunthorpe with Win 7 Beta, here's a tip. Simply, you'll have to uninstall it. Scunthorpe does not install itself properly anymore and requires rebooting just to turn on. Yep, that's the way it is. Scunthorpe happens to be one of the few apps that run on Win 7 Beta that do not integrate with the OS properly (i.e., not start when the PC starts) yet you have to uninstall it to remove it. Yep, that's the way it is. Scunthorpe happens to be one of the few apps that run on Win 7 Beta that do not integrate with the OS properly (i.e., not start when the PC starts) yet you have to uninstall it to remove it. I just did a clean install of W7 Beta and could not find Scunthorpe to be able to uninstall it. When I go to add/remove apps (Win key + R) there is no Scunthorpe listed. Not that this is a problem, I'm just making sure I'm not missing some other apps I installed previously when installing W7 Beta. 60% of upper and 33% of lower extremity burn injuries were among employed people. This figure means that male and female suffered burn injuries more than any other group. Males were more prevalent in all groups. More than half of the upper and lower extremity burns were due to scalds. This is followed by contact and flame burns and then by electrical burns. The most frequent occupational burn site was the hands, arms, and legs. The burns of the lower extremity required more medical treatment, longer hospitalization, and caused more psychosocial problems than the upper extremity burns. The mean time to complete skin grafting was shorter in the upper extremity burns than in the lower extremity burns, which is contrary to other reports. The psychosocial problems tended to be worse in the lower extremity burns group. Depression was the major psychosocial problem followed by anxiety, sleep disturbance, and decreased social functioning. Anger and agitation were less frequent, but dissatisfaction and indecisiveness were the most prevalent. This reflects the fact that the psychosocial problems were more severe in the lower extremity group. That study used 2 different

Description of the Related Art A copying machine and a print machine are provided with a manuscript reading unit and a printing unit in order to read manuscript images and print images of the manuscript. The manuscript reading unit reads manuscript images using a manuscript having a regular portion and a transparent portion that can be distinguished from each other. In recent years, there has been an increasing demand for a transparent portion in a manuscript reading method. Japanese Patent Application Laid-Open No. 11-167207 describes a technology in which the page number of a manuscript is printed on the transparent portion of the manuscript in the printing unit and the printing unit recognizes that the transparent portion has been read. When the page number of a manuscript is printed on a transparent portion of the manuscript, the page number is often printed on the transparent portion of the manuscript and the transparent portion is not printed. In this case, there is no interference of the page number on the transparent portion, thereby causing no particular problem. However, when the page number of a manuscript is printed on the transparent portion and a plurality of page numbers are printed on a single document, it is
