
SketchUp Instant Road Nui Plugin

instant Road Pro SketchUp plugin instant road plugin sketchup instant road sketchup plugin instant road plugin for sketchup I tried a slightly different approach but no luck. Somehow I had to change the way I select the outline. Then I could. The result with the new Sketchup version is as expected.

```
\draw[if\pgf@linenum >=6  
\else\pgflinestyle#2\fi] (0,2) -- (0,0) -- (0,0) -- (0,2) -- (0,4) -- (4,2) -- (4,0) -- (4,0) -- (4,2) -- (0,2) -- cycle;
```

However this approach would not work with the plugin? A: I would expect that this is a mistake on Sketchup's end, and not a bug. If you load in the Sketchup draw environment you will see that the parts of the lines are duplicated (just as you are experiencing). The parts of the lines generated by the Instant Road Pro plugin do NOT always have the same endpoints on the Sketchup draw screen. I have not found a way to use the Instant Road Pro plugin with the Sketchup draw environment. The only way I was able to use the plugin successfully was to do it through the Materials menu inside Sketchup. The materials plugin allows you to turn the ground into perfectly round surfaced roads. If you use Sketchup 2013 or higher than the plugin supports. To get it working with Sketchup 2015 you just need to add the plugin to the Sketchup plugins folder and restart Sketchup. To do so open Sketchup, go to plug-ins tab, plug-in tab, plugins. Open the folder that includes the Sketchup plugins folder, open that folder, and find the Sketchup 8 folder. Inside you will find Instant Road Pro. Drag the Instant Road Pro Sketchup 8 folder into the Plugins menu on Sketchup. Then restart Sketchup and start using the plugin. If you use Sketchup 2015 or higher the plugin is a bit more complicated to work with. To do so go to Sketchup, go to materials menu, materials, materials properties. In the materials properties window click the plus button on the bottom left and select Instant Road Pro.

You will then be able to set the road surface properties
