### What's New In Universal Bypass For Firefox?

Universal Bypass for Firefox is a simple add-on for individuals looking to speed up their online experience. The extension does not require specific computer knowledge if you want to enjoy its basic features. For more advanced functionality, it's recommended that you do not attempt to change anything you don't understand. Enjoy this application's features and don't waste your time waiting for any countdown timers to finish while downloading something. Avoid trackers too with this add-on. Price: \$0.99 File size: 3.8 MB Direct link: Changes: 01.26.2012 - Initial release Avoid cross-site tracking or click trackers which can be used by advertisers to see what websites you visit. Most websites will allow you to opt out of cross-site tracking if you make sure the privacy setting is toggled to "On", so you are sure to keep your preferences. Most websites will also allow you to opt out of click trackers (and the associated Internet Explorer usage data) if you make sure the privacy setting is toggled to "On". You can also prevent most click-tracking through browser extensions. An internet speed booster which supports all kinds of firefox addons. If you feel that firefox performance is lacking, this is the tool for you. It really is. It is a tool that tries to optimize your firefox start up time by resizing the size of the ext and many other performance enhancements. Did you notice the following (subjectively – can be subject to change depending on situation and experience) improvements: Firefox start time is reduced by 1-2 secs (10-20% faster startup) Most addon start times are reduced by 1-2 secs (8-15% faster startup) Most ext size optimizations are reduced by 1-2 sizes (15-30% faster ext sizes) You can test performance in 2 ways. 1) Go to about:performance 2) Run firefox with this add-on and go to about:perf 3) Run firefox with this add-on and go to about:newtab To see benchmark data. Use these tools to discover where some of the extra time you are spending on your computer is being consumed by all of your extensions.
