inspirations: 1. She Has One of the Most Amazing Wardrobe Changes Ever! Rosie is all about making fashion statements, and we're all jealous of her closet. She's lucky to have a top stylist and personal shopper on her side, plus she has a closet filled with wardrobe staples and extravagant pieces. She usually sports classic pieces for day, and it's a no-brainer for her to wear an evening gown for special occasions. This is why she has a variety of beautiful dresses from which to choose, and we love her style. 2. She Likes to Wear Sexy Red! The red that Rosie wears is really all about the red hue. She doesn't always like to wear red, however. She's all about different hues and coordinating outfits. It's hard to believe that someone as elegant as Rosie could be seen at an "EDM" or event. Red is all about glamour and seduction, and Rosie is always amazing in that color. 3. She Doesn't Like a Hard Nail Polish Rosie is known for being casual and comfortable, but she doesn't like to wear a hard nail polish. Instead, she's all about light and dark colors. Her nail polish isn't hard and gritty, and it's not bright. She knows that women have to take time to do their nails, and she's not about the drama. 4. She Likes to Coordinate We love the fact that Rosie doesn't wear random colors. She has a collection of similar colors and a different look for every event.
