## Euro Truck Simulator 2 Mod Auto Stop 44

**Download**

(about every 3-5 minutes). Is there an easy way to change or disable autosave without having to install mods and such? If so, how? Yes, there is. Use this at the console line: `$HOME/.profile`  
After that, use the command: `$HOME/.bash_profile` The result will be that you will have pure bash as your shell. What is bash? bash is the standard shell that comes with Linux. The first time you run it, you will be running a command line, but you usually don't need to run it since you have to use `gcc` - this allows you to run your code.
