## **AutoCAD Crack Download [Win/Mac] [April-2022]**

Mobile apps As AutoCAD Torrent Download is licensed to individual users, it cannot be downloaded and run for free. However, mobile users can browse and download free trial versions for limited time or premium (paid) versions. A single premium license allows users to download and run AutoCAD mobile apps on five mobile devices, including mobile phones and tablets (see table below).

Additional mobile apps can be downloaded only on an annual subscription or purchasing a plan which covers one license and five mobile devices. Mobile apps include the full version of AutoCAD for iOS, Android and Windows Phone, and AutoCAD LT for iOS, Android and Windows Phone. AutoCAD LT is an economical, low-power version of AutoCAD. It provides many of the standard features of AutoCAD, but is limited to two concurrent users and desktop. Mobile apps do not have an offline mode. The AutoCAD mobile apps can be run on iOS (iPhone, iPad, iPod Touch), Android (Samsung Galaxy, Sony Xperia), Windows Phone (8, 8.1) and Windows 10. Web apps The AutoCAD web apps (see table below) were first introduced in 2014. Web apps require a subscription, but the basic features of the desktop app can be used on these platforms. A single license, if purchased, allows users to run the desktop app on five mobile devices (see above table). The web apps are intended for occasional users or those working on remote or mobile sites. In 2019, the AutoCAD web apps are discontinued. History Autodesk first developed AutoCAD in 1982 as a desktop app for the Apple II computer running on an external graphics controller. The earliest AutoCAD has only a single user interface and no Windows interface. AutoCAD LT appeared in 1990, and was originally called AutoDWG. The first version of AutoCAD for Windows was released in 1991. The mobile apps were introduced in 2010. Adoption The number of users of AutoCAD has been increasing steadily since the introduction of the desktop app. The number of active users was around 80,000 in 2013. In that year, the total number of AutoCAD users was estimated at around one million. In the US, where the app is the most popular, AutoCAD usage grew by more than 10% between 2012 and 2013. In 2014, more than 14 million licensed AutoCAD desktop
