keygen xforce team. Help About Us eGov.ch provides a complete solution for protecting and securing digital certificates for local authorities. SSL/X.509 certificates play a major role in any secure communications. Our eGov.ch solution is a user-friendly tool, which enables you to easily manage your certificates and to check them for validity.

1. Field of the Invention The present invention relates to oil filters, and more specifically to improved oil filter and oil filter cover unit, which can provide a compact and practical configuration.

2. Description of the Prior Art The use of oil filter and oil filter cover unit are well known. Typical oil filter and oil filter cover unit are disclosed in, for example, Japanese Patent Application No. (Tokkai Sho) 59-137811. With reference to FIGS. 1 and 2, the prior art oil filter and oil filter cover unit comprise a metal member 3, a spring 4, a block 5, a rubber member 6, and a cover 7. The metal member 3 is integrally formed with a tubular shape and includes a cylinder portion 4a which extends along an inner circumferential surface of the metal member 3. The cylinder portion 4a is formed into a circular shape in a cross-sectional view thereof. A circular projection 4b extends radially outward from a bottom portion of the cylinder portion 4a, and includes a substantially rectangular cutout for receiving a resilient stopper 9. The spring 4 is formed into a substantially rectangular shape in a cross-sectional view thereof and is mounted between the circular projection 4b and the metal member 3. The spring 4 has a pair of spring legs 4c which extend in opposite directions from a central portion of the spring 4. The spring 4 biases the resilient stopper 9 in an upward direction in FIG. 1 so that the resilient stopper 9 is maintained in contact with the circular projection 4b. A circular recess 10 is formed in the bottom of the cylinder portion 4a in an upper section of the metal member 3. A hole 13 is formed in a side portion of the metal member 3 to allow a cup shaped oil filter (not shown) or a can shaped oil filter cover (not shown) to be fitted in the recess 10. The cup shaped oil filter and the can shaped oil filter cover have an opening 19 which may be aligned with the hole 13. A flange 14 is formed on an upper end of the metal member 3. The
