In this article, we provide an overview of AutoCAD's history and recent releases. AutoCAD history In the late 1970s, computer-aided design was becoming an important part of the engineering process. In 1972, IBM introduced the first CAD software for the mainframe architecture called End-View. This was followed by AutoCAD in 1982 and Microstation in 1985. Before this, engineering had been done using paper and pencil. AutoCAD (2012) In 1981, Autodesk acquired Sirona, a leading CAD software company, to form Autodesk Sirona, Inc. The company merged the operations of Sirona and End-View to form Autodesk Media and Entertainment. The company was renamed Autodesk in 1997. In 2001, Autodesk announced the launch of the Autodesk Virtual Design Environment (VDE), which was to replace the older AutoCAD system for desktop CAD. VDE is available for Microsoft Windows and macOS. AutoCAD launches In 2010, Autodesk launched AutoCAD LT, a lightweight version of AutoCAD for non-engineering projects. AutoCAD LT was also available for macOS, with a similar interface to Windows. The software was discontinued in 2013. In 2016, Autodesk announced the re-launch of AutoCAD LT, with the new name, AutoCAD Classic. This new version is available for macOS and Windows, and features a traditional CAD interface. In 2017, Autodesk launched AutoCAD 360, which offers engineers a 3D experience for their design work. AutoCAD 360 runs as a web application and integrates with existing AutoCAD files. It can be accessed from any browser using the AutoCAD 360 desktop app. AutoCAD Mobile Apps To complement the desktop and cloud versions of AutoCAD, Autodesk launched AutoCAD Mobile Apps in 2017. They include a high-end mobile app, AutoCAD for iOS, and a cheaper version, AutoCAD for Android. The iOS app was designed by Apple and is based on Apple's own design guidelines. The Android app was developed by Autodesk. Both of the mobile apps are available from Apple App Store and Google Play

In addition to providing automatic functionality, AutoCAD has many built-in features to help the user perform simple but powerful tasks. Part Types and Properties Every part within AutoCAD must be assigned a part type. Each part type has unique characteristics that are used to display and measure it on the screen. In a drawing, there are several tools that are primarily used for drawing parts. These tools are found on the status bar and main menu bar of the screen. Tools include: Marker tool, Grid tool, Hole Punch tool, Fastener tool, Placement tool, Box tool, Eraser tool, Shape tool, Pen tool, Circle tool, Rectangle tool, Selection tool, Draw tool, Ortho tool, Drafting tool, and others. While drawing and editing, parts can be assigned to layers, some of which are independent of each other. These layers can be used to keep parts out of the view of others or to facilitate publication. The Properties palette can be used to quickly alter the properties of a part. General Features All of AutoCAD's basic functions such as Draw, Undo, Save, Zoom, and Pan are available from the ribbon toolbar. Alternatively, they can be accessed from any main menu by choosing View | Settings | Current Settings | Apply. The drawing window has many tools that can be accessed from the ribbon bar. These tools allow the user to choose from a variety of shapes (including many polyline, polygon, spline, and bezier path shapes), shapes (including arcs and ellipses), lines, and text objects. The user can use the scale, rotate, mirror, fill, and align tools to modify parts, paths, and objects. The user can annotate the drawing by using the text tools and pick tools. The pick tools are located on the grid, on the pop-up menus at any tool, on the status bar, or on the image editing toolbar. The annotation tools are located on the ribbon. The drawing window also allows the user to change the measurement units (to feet or meters) and paper size (to A0, A1, A2, A3, or A4). User Preferences The drawing window can be set to one of several user preferences. The defaults are set to offer a drawing experience that is easy to use. ca3bfb1094
