Like we all know, Threes is a unique game, but it also doesn't require you to be a genius to understand it. Instead, just some basic concepts, and creativity. Introducing... THREE'S TRICKSHAPE As all of you probably know, Threes is a fun, fast-paced puzzle game. But what you probably didn't know is that Threes has a second mechanic, hidden in the shadows. Meet the Trickshapes. A group of shape-shifters with their own specializations. (warning, we're not going to tell you what they can do, it's better that you find out by yourself!) You can play a little bit of Threes, and you're already in the middle of this story. But the best part is still coming, because there's a lot more to discover... TOUCH POTENTIAMENTUM Using Threes' second mechanic, touch potentiamentum, you can transform into a different shape. You can change into any one of your shapes as many times as you like, but you can only have one active at a time. And you can choose which shapes you can transform into by touching and interacting with the shapes around you. In Threes, you can use potentiamentum to jump, to pick up, to overlap shapes, to push blocks over, to push blocks away and so on. Even to create your own shapes! AN OVERWH

CONTENT

Gameplay

You are Thomas, a seemingly simple pawn in the game of dreams. But when you are called on to decide between the true King and the Queen in a chess-like game of dreams, you will learn the consequences of a false choice.

The object of the game is to choose between playing the Queen or the King in a chess-like game of dreams. Both sides of the board should be filled before beginning, as players will alternate between each side each turn to collect a certain number of objects. The game continues until one side is destroyed.

The King will bring you a crown when you are faithful. The Queen will play a song when the King chooses a chess position, changing the theme to fit that part of the game. The Queen can also give you a -10 power damage to help you win but will drain your power if you are not careful.

PRAGUE, PRAGUE

Yes, the King is just as important as the Queen. This time you don't get to play. Instead you perform your duty to protect the King, draining your power carefully. You hear the stories in your dreams—and help them. If you help five stories, they are all cured and will leave you alone. However, if you help just one story, the King will probably go

Our first official Wayward soundtrack is here! Hope you like it. Over 1 year ago Visitor Messages Any chance you guys will be able to add new or interesting ways to customize your character in the NEXT update? Like how you customize a character's name, skin, and basic stats in Street Fighter 5. 3 years ago Awesomenauts will be released worldwide on June 15th. Take part in the beta now to be among the first to try the game. 3 years ago >Can we expect more information about the upcoming birthday update for the game? Game DescriptionThe Mechs vs. Humans (MvH) is an upcoming game that aims to accomplish the same grandiose "tactical/RPG-ish" objective as Stardew Valley while attempting to be a mech game. What are Mechs, you ask? Mechs are seen in dozens of fictional Sci-Fi, Fantasy, and Science-Fiction stories throughout history. They've been imagined from robots, armor, and some using giant balls. However, the tech behind real-life engineering has stopped development of robot soldiers for several generations, though they could be coming back in the form of AI. MvH presents us with an alternative scenario; where mechs are real and the humans are trying to stop them. MvH will combine a combination of action RPG and strategy to create a game with numerous challenges. The battle system will let you command your mechs to use the terrain (sand, water, mud, and wooded hills) to your advantage. The RPG-like side of the game focuses on strategy, decision making, and character progression. Vecna is all I want right now. I want to see Matty dukin someone. At least he wouldn't piss off everyone, unlike Joker. I don't want him to do a solo show, but I also don't want a full blown crossover in a year like they have been promising. Just give us a single hero or 2, and then focus on the BvS for a long time. I'd much rather they do this, than do a full blown crossover with Joker. But I digress. The two rumors I'd like to see is Drax vs. Superman. And then there is the C4 idea that you guys have been bringing up all this time. I want to see what would happen if he punches somebody. Who? Maybe Marvel's Agents of SH

What's new:

The year is 1989. A deadly pandemic spreads to every country on earth in less than 24 hours. Hospitals quickly set up isolation wards where hundreds of thousands of people perish within a week. In West Germany, it leads to the collapse of the whole East German system. Arminius Strebauer, a 23-year-old promising artist, suddenly leaves the art academy and lives in an island. Meanwhile, he is observing all the events from his isolated yet connected position. It is later revealed that he is the creator of a computer virus that infected the whole planet. Due to this, a Communist revolution starts and the world is in chaos. And some scientific claims are discovered that could have huge consequences for mankind...
