Q: Fastest way to check what files are being read from storage. [Unresponsive MongoDB] I am developing a program to read a snapshot of a mongodb database (stored in mongodb) from disk (to process the data and to minimize the I/O load on db server). Is there a fast and consistent way to know which files are being read from storage without storing the names in a list and then updating it after each chunk of data has been read? I am implementing this in .net and using mongodb c# driver. A: If I understand you correctly, you will have an asynchronous read operation, where each chunk of data will be written into the file, and only then will you have to process the "snapshot". Given that the MongoDB server itself is responsible for the I/O load, what I would do is call the put operation with a high exclusiveLocking() request option (until you receive the ok), to block the server on write operations while you process the data. See if the data processing will not take too long (in a millisecond range), you can go ahead and forget about the blocking write operations and rely on the server to block other writes, according to the exclusiveLocking request option. Carlos Barria/Reuters Nintendo, the Japanese videogame giant, will post its first annual loss in more than a decade. Its revenues and sales were down, and its forecasts for the rest of the fiscal year were lackluster. The company, which gets much of its revenue from the sales of its Switch hybrid game-console and the money it makes on the games that it develops and sells on its own machines, has seen sales of its once-lucrative 3DS handheld fall sharply. Third-party game sales have also declined, as Nintendo has placed less emphasis on allowing other companies, such as the game-makers Electronic Arts and Ubisoft, to publish games on its hardware. Adding to the woes, Nintendo was hit with a second major breach of the security of its online network, this one by the game distributor Take-Two Interactive, one of the company's most important partners. No information on how the breach was carried out was given,
