Players can also transform into a new form for the first time in FIFA history, with Fan Shots, an unprecedented new feature that allows players to take from around 50 to 200 “Fan Shots” in which they fully transform themselves from human to ball, allowing them to be used for a whole new range of fan-related activities. Players can also create their own custom plays in new Hack Playmaker tool, allowing them to create match-breaking set pieces and creative attacking moves on the fly. “This is the first time ever in the history of FIFA that we’re able to use the most up-to-date game data available from a full-scale, high-intensity, competitive football match,” said David Rutter, FIFA Technical Director. “By using

advanced motion capture data, player and ball physics are more physically accurate, creating a more realistic gameplay experience.” FIFA 22 expands on the core gameplay concepts of previous FIFA titles, reinforcing the core “pass and move” gameplay with new tools and building on the foundation of movement and ball physics that FIFA has been known for for more than two decades. The renewed responsiveness of ball and player physics was one of the core focuses for FIFA 20. “This is a world-class game,” said David Rutter, FIFA Technical Director. “FIFA 20 marked the first time players could create their own shots from multiple areas on the pitch. Today, we are excited to take that a step further with new Fan Shots and Hack Playmaker tool, as well as building on the responsiveness of ball

physics to create the world's most authentic football gameplay experience." Building on the core gameplay of FIFA titles since the late 90s, FIFA 22 expands on the core concepts that have been at the heart of the series - passing and movement. This year, we focus on the point where players pass and move the ball, react to moves and more with a series of new tools and improvements to the core gameplay of the series. FIFA players are characters in a fully-realised, high-intensity football match. FIFA 22 keeps the gameplay roots while bringing the character of the game to a new level of accuracy and realism. FIFA 22 features: All-new HyperMotion Technology Drives Gameplay to a Higher Level of Authenticity with Physical Realism First ever Fan Shots
