When a player kicks the ball, for example, special animation effects such as exaggerated motions, which give the game an intense feel, occur based on the player's movements. Exploiting the data, EA Sports is designing and creating animations for various actions, including dribbling, running, shooting and goalkeeping. FIFA 22 also includes the "FIFA Ultimate Team" mode, which allows players to collect soccer stars, clubs, venues and kits to unlock a team full of players to take into battle. For example, players will unlock a new squad by progressing through the FUT mode with a carefully curated collection of player and team properties. Players will be able to trade players with their friends on both PlayStation 4 and PC via cross-platform play, and will be able to import and export items from each platform. The "My Player" mode, which was added in FIFA 17, returns in FIFA 22 as a mini-manager simulation. Players can create their dream squad to compete against other FIFA players, and experience training, managing finances and other aspects of a soccer career. Players can also face off against each other in online-only matches. Head to head matches will have multiple players on each team, with AI opponents and collisions possible between the players. Features Key:

- **Innovation** - The world's game engine has evolved again. There are more options to make the game run smoothly, and new and improved AI in duels and player actions make FIFA 22 the most authentic simulation of real football in all its glory. The new 3D Pro Player Vision System brings to life the players of the future, with improved animations and Artificial Intelligence.
- **More Realistic Gameplay** - Real-world data is used to improve gameplay dynamics and on-ball behaviour. The revamped player movement and full body workspaces allow players to control the ball with greater precision, connect more passes, control players with stability, and track players in tight areas. Performers like Alessandro Del Piero and Giorgio Chiellini will be more authentic, and utilise the game engine to produce the real physical performances of the football legend.
- **Team Bonuses** - Play in complete and pure soccer environments. The new dynamic weather system makes the stadiums react to the conditions, bringing a new level of excitement to the matches. Adding to the environments are a variety of new crowds that interact with players. Get the ball out and score the winner.
- **Dynamic Hot Zones** - More off-ball activity, more goal kicks, more free kicks, more tackles, more dangerous shots and more completions. Put these into play with an array of new attacking and defensive tactics, and find more effective ways to exploit opponents from every angle. Teams will be pressed high up the pitch at all times and off-ball battles will determine the flow of the game.
- **Complete Control** - Utilize the highly intuitive Quick Pass and Precision Pass controls to create and inspire attacks down the flanks. Utilize long passes to move the ball forward, and short passes to tie the ball up on one side for a shot at goal. This year's FIFA introduces a brand new shot anticipation control that influences shots taken by the player - the stronger the reaction, the higher the possibility of a shot.
- **Improved AI** - A comprehensive overhaul in the old player decision making makes it that much more dynamic, realistic and challenging for players to take control of the pace and flow of the game. Players make quicker decisions, meaning multiple events can happen from one play. To challenge the AI, work cooperatively as a team and win on pure talent

What's new in Fifa 22:

- **New Player Ratings (how much change/improvement has been made in each stat compared to the old version?).**
- **Customizable Team Styles (distinguishing your team to your squad. This can become incredibly costly to achieve, but it's a cool feature (especially if you're with EA?)).**
- **New Gameplay items. Shoot out of the blocks from any angle and weather the impact with sensational full-on tackles and aerial duels and recover after a wobble with unbeatable balance controls. It's never**

been easier to score a headed goal. Enjoy epic set pieces and send your opponents the wrong way with deadly free kicks. When these explosive attacks aren't enough, bombard your unsuspecting opponents with a deluge of goal-scoring crosses and panenka volleys. And never take your eye off the ball (or the opposition player it touches) as your crossed balls and airborne balls have the same capabilities to end in the back of the net.

- **New team tactics.** Choose from three new, star-inspired teams, switching between a 4-3-3, 4-2-3-1 or diamond formation.
- **Improved handling.** An enhanced hand-to-eye coordination system makes dribbling a much smoother and more accurate process. When playing with a regular controller, move the right stick in any direction to guide the ball where you want it to go.
- **Improved passing.** An improved ball control and finishing system allows players to more easily score and to occasionally pass the ball into a small passing window created by the opposition. Improved short-range passing controls have been added for fingertip passing precision and with the enhanced dribbling system, players can now pass while moving at pace.
- **Enhanced dribbling.** Pass, turn and shoot - all at the same time. Manipulate the ball with an improved dribbling system that gives you more control over the ball
- **Improved physical details.** FIFA 22 delivers more accurate ball physics, resulting in shots from all distances which curve and round off as they reach the goal. Player movement has been significantly improved, with a new Exertion Engine delivering more realistic player control and touch. Finally, avoid the opposition when tackling thanks to improved veracity that allows you to stop plays early.
- **New commentary.** Five new commentators (Jason Bell,

Features: Sling Shot: This new shot has allowed us to add another dimension to the pro and amateur level. Picks and rolls: These new animations in the control of the ball and pass are more precise. Drive and pass: When you have the ball, you have the choice between pass and dribble. Better and faster sprints: This allows you to increase your speed and get away from the defender. Choose your style of play: Depending on the level, you can modify the defence, the midfield or the attack to the way you prefer. Head-to-Head: A new opponent will put his strengths to test. New playoffs: The new game mode is a big step forward to adapt to the best teams and the main players of the world. New rivals and teams: You will meet in the playoffs five new teams in a real competition. New stadiums: The new stadiums are now even more varied and the player will have the chance to feel like he is in the famous stadiums of the world. Brand new league: New opponents, new league, new challenges!

Sling Shot: The Sling Shot is a shot in FIFA that allows you to hit a shot from a distance from a bad angle. It's a very useful shot that is a little bit different from the regular shot, but if you have practiced it you will be able to control it. To launch it, go to the player selection screen, press the button of the shot and adjust the angle. You will see that the ball will deflect and you will see the
