Houlo Video Downloader Premium 7.65 Crack [CracksNow].Q: How do I show only the rule for a category in my console output? I'm using Groovy 2.4.6 and Grails 2.4.0. I have a GORM domain class called Category which has one-to-many relationship with Product. I've created a search filter to show only the results that match the given keyword and tags. Search filter: class SearchCategory { static constraints = { keyword regex: /^[^\s]*/ } String keyword List tags boolean matches(Category category) { return keywords.contains(category.getKeyword) || tags.contains(category.getTags) } } Controller: def categories = Category.findAllByCode(params.code).withCriteria { eq('keyword', keyword) if (params.tags) { anyOf { tag(params.tags) } }
