At the top of your JSpinner the "Show Statistics" button is there. Click it and you can see how many times and how many items were generated. Step 4 : Select the button to start the Scraping Tool The Configurations are saved automatically in a file which we will edit. You can then import it at the same time as new configurations using "Upload configuration file" button. A content of a file which contains a complete configuration is : 2) Edit the file and save it Also, download the code from the below link to test it out. Check the HTML to see how to get the HTML from the website. HTML of the website : Step 5 : Start the process To start the scraping click the green button on top of your

JSpinner. This will start the scraping. You should see the button disappear. Step 6 : Switch the Scrape Result to "Real Time" At the top of your JSpinner you will see "Real Time". Click the button and you will see the result. You should see the code appear on the page if the scraper is working properly. If it doesn't appear, it will appear after the page refreshes. Option 2 : Skip Logo Text and Show Page Header Click the two small orange arrows (top right corner of the screen) and select the "Show Logo text only" option. Click "OK". Step 7 : Select a Folder to Upload Page to Click the "Choose folder" button and locate the folder containing the HTML. Open the HTML file in Notepad or similar (I use notepad++). To download a program that will allow you to open HTML files on windows, you can use this link. You may have to wait a little while, depending on the speed of your internet connection. Step 8 : Upload When you are done entering the information, click the "Upload configuration" button. As soon as you click this button, it will take you back to the configuration screen. There will be a small "Configurations" text below the "Show Statistics" button. There is a new "Configurations" button above this small "Configurations" text. Click
