Goldman Sachs ends China inbound travel ban, allowing some travel Goldman Sachs has lifted a ban on inbound travel by certain staff members and retirees to China and Taiwan, the first major U.S. investment bank to make such an announcement after days of mounting tension between the world's largest economies. The ban, which was implemented in the run-up to the trade war, had held for China and Taiwan only, and applied to Morgan Stanley and J.P. Morgan Chase, which have no direct offices in China. But Goldman Sachs said on Wednesday that it will no longer "selectively" follow the rule. It said it was opening both countries to Goldman Sachs employees for business and personal travel. It did not say how many people would be allowed in. Goldman Sachs's announcement marked the most significant step in easing restrictions on U.S. financial firms' travel to China since the trade war intensified last summer, but it had long been expected to be lifted. "Goldman Sachs is a company with an important presence in China, and we have always welcomed the very significant business opportunities that it brings," Chairman and Chief Executive Officer Lloyd Blankfein said in a statement. "We're pleased to have reached this accommodation with the government and look forward to greater access for our employees." The restrictions, imposed in August, followed a series of meetings in which U.S. officials accused China of repeatedly breaking commitments to protect U.S. intellectual property. The latest round of retaliatory tariffs came on Friday, prompting the decision by several U.S. banks to restrict travel by their China-based staff to the world's second-largest economy. The rules apply to inbound travel only. U.S. investment banks are wary of China following a 35 percent tariff on $112 billion in U.S. products imposed on Sept. 24 and last weekend's arrest of a senior executive of Huawei, the world's largest telecommunications equipment maker. "I don't know what is going on in China," said Wells Fargo & Co. executive, noting that travel restrictions are rarely lifted in the U.S. "It's a very fluid environment, especially in China." "It's usually the other way around — China restricts travel, then we restrict it,"
