“As the war for the lands of the Elden Ring rages, a select number of Knights will be commissioned into the New Order to rule, lead, and protect the lands.” In the world between the order and the chaos, the infamous slums called the Elden Ring arose. The knights of the New Order, who have lived in a continuous conflict with the Lords of Chaos for the past decade, will have a chance to return to a world without war. The worlds of the Elden Ring are scattered in the distant lands, with no place for them to call home. It is here where you will take on the role of one of the New Order Knights and rule over the lands of the Elden Ring. Raising your forces, offering sacrifices, and striking battles with your party. Along the way, your personality and skill will define your destiny. Game Summary: The Wasteland “The power of money and the power of greed: The power of the chaos and the power of the order.” At the beginning of the war for the resources of the Elden Ring, the land was divided into three: White lands Blue lands Black lands The White Lands and the Blue Lands were free, but the Black Lands were occupied by the knights of the order. The Green lands, the Black Lands, and the Red lands had no businesses, and were the most dangerous of all. If they were inhabited by the noblemen of the chaos, their hatred for their enemies, the order, would be at its peak. Players can choose one of four customisable classes. Knights: The Knights specialize in physical combat. They can utilize heavy armor, and not only decrease the damage from their attacks, but also resist certain kinds of attacks and reduce damage taken from powerful spells. The Holy Knights specialize in magical combat. They utilize holy

spirits known as Guardians to divine the enemy, attacking their weaknesses. The Strikers specialize in both physical and magical combat. They can utilize weapons made from eternal iron, which will only disappear when attacked. The Assassins specialize in guile. They utilize their skills to get close to their enemies, and attack them as needed. Players will start the game with a majority of money in their accounts, and will enter a battle with a selection of quests that will grow with each new quest. Quests are given when a questgiver

Consider how much work it is to "write" a single area of a program. A good way to measure your time spent not what would have been better but, if you dropped the details and slowed things down. Imagine it re-done now with a lot more details, and a little better logic in your head could do the same thing. Trying to write super complex stuff always ends in power failure for me. E.g. all of the CRUD stuff is trivial. Given the option I choose not to do that myself for that reason. There's nothing wrong with simple. There's much wrong with overcomplicating things. That said, it's possible to do things in a simple straightforward manner that doesn't necessarily pass off as a mindless robot task that is of no use to humans. In other words its possible to make something that is moderately usable without having an army of a brain. But, and again, thats not the point. The point is that not all things can be made simple or all things can be made extremely complex. It all depends on the task. Advisory to fellow programmers: Do not make programming projects with classes in a

mindcrime Very nice! [Edit] The project looks interesting. I have a few questions: (1) How do you plan to deal with months where you don't make any progress at all, due to going part-time or otherwise having a "gap" in your schedule involving nothing but business travel, vacations, etc.? Do you plan to simply store that "missing" data as just a "gap" where the progress bar is at zero, and then retry later, with a bit of a starting position from where you left off, to catch up? If so, I think this approach might work for you. Another strategy might be some statistical bff6bb2d33
