When I look at the documentation online, it says it is certified for riding for up to 30 minutes at speeds of 10 mph or less, for up to 100 meters (nearly a quarter of a mile) at speeds of less than 25 mph. The document also says the maximum air pressure is 49 psi. I know the exact model of our bike is the Blackburn T250. Is there any way to determine if our bike is UL522.1 certified? How are air pressure and tire pressure checked?
