We are pleased to announce that the production of Shin Megami Tensei IV: Apocalypse has finally started! We're focusing on gathering a team of talented people to build this game. However, since the announcement, we received a lot of comments and questions that we wanted to answer: - What was the meaning of the capital letter "A" in the title? "Shin" in "Shin Megami Tensei IV" is the game name and "Megami" in "Apocalypse" is the subtitle that refers to the story of the game. So the correct title is "Shin Megami Tensei IV: Apocalypse". - Why did we choose the Shin Megami Tensei series as the subject of the new title? The title of the game is designed to be a sharp contrast to some of the series' past titles. We tried to keep the prominent characteristics that made the Shin Megami Tensei series known by everyone, while modernizing it a little bit. - There was no intention to give the main character a [slightly] more appropriate name. "Shin Megami Tensei" is a term for the person who kills and resurrects demons and "Megami Tensei" is a term for the person who controls demons. So, to keep it as an "Shin" and a "Megami", we could not change the title of the game from "Shin Megami Tensei IV: Apocalypse". - The meaning of the expressions "Apocalypse", "Breakthrough" and "Evangelion" Shin Megami Tensei IV Apocalypse is about the appearance of an apocalyptic force called "Apocalypse" that breaks through humanity and other creatures, and how the "Evangelion" is awakened as a response to this. - Why did we change the game's engine to Unreal 3 from Unreal 2? Unreal 3 allows us to implement the game in a powerful way that we couldn't before. - What does "New World" mean? It is the number of people who are playing the game. The system prevents 2 players in the same place at the same time. It is a measure to prevent the duplication of the number of players. - Will I have to save the game and reset to the main character in order to play through this title? You do not need to do so unless you
