2. Click the Create button. AutoCAD is now installed. You will now be presented with the Main Menu. From the Main Menu, select File|Import. Choose the location where you downloaded the Autodesk Design Review (.dwd) file from the site and click Open. Navigate to the folder that contains the profile you created with your Autodesk Account. Close the Import

dialog box and select Open. If you have not created the profile that contains the necessary information, you will be prompted to create a new profile. Select Open and a new drawing will be created and opened. From the Main Menu, select File|Save As. Select the folder location that you want to save the drawing to and select Save. Once the drawing is saved, exit the program. Your drawing should be saved as
