This is the best photo manager application available. After using it for a few weeks I can't go back to the static function built into my phone. In addition to being able to create custom themes, include YouTube videos and Crayola images, I can create lovely slide shows using this magnificent application. I

didn't realize that the quality of this application for listing, organizing and viewing would be so good. I even imported RAW images without any issue. It should be noted that you also have the option to burn images to a CD and format your SD card! The iPad and iPhone applications are not only spectacular but they are also free. In fact they are even better than the

Android application. If you buy one of these photo managers you will never go back to your phone. Awesome by N9ZF Awesome app, so far the best on Android. Best Camera app by Quiesser! Amazing app. I use it with my Nokia to send pictures from the camera to the computer. Everything worked as expected. Love it. by nick Works fine but I

wish they'd get rid of the package manager so you can use your download file name. Great functionality. by warren Love the functionality of this app. Best app for the whole package by Susie F. Best app for the whole package. I can't say enough about how excellent this app is. It's really so much easier than other similar apps out there. Even though this app

is very expensive ($6.99) I think it's definitely worth it. I absolutely can't wait to see what the developers have in store for us next. Love it by Dwayne R. So far this is the best app I have used! I am a professional photographer and it is amazing how much I can use this application for my personal use and business. Excellent app! Awesome by Colleen S. I can not say

enough about this application. It is easy to use and extremely good in its functions. It is even superior to the camera application that is built into my smartphone. it's ok by liew it's ok really great by Joel This app is awesome. I use this app all the time. The only drawback is that some of the items the app
