/detail.action?docID=. Sharma, R.. 01-04-2012. Cracking the Ebooks Trail: How to Write a Book. We have been working in this space for quite some time now, and based on an analysis of our journey, we have come to the conclusion that the benefits of consulting by various commentators outweigh the costs. They strengthen the credibility of the project and strengthen its chances of success, so as to have more room for greater resources. We will include in this analysis new ways to increase efficiency, both quantitative and qualitative. After reviewing this list of benefits, you will notice that when we speak about consultants, the scope of the project enters our network of professionals. They will help our business in the following ways: To develop a roadmap for the technology and the effort that need to be invested for an effective business; To define the best solutions that each company has, both in terms of the internal processes and the external demand; To help identify and create synergies among our partners, customers and suppliers. This is a free list of services that can be performed as part of the consulting process, and they are also at the service of a client. We will use this list to strengthen the consultants we have, but we will not charge them for it. We are trusting that they will include the work in their proposals. The most important thing is to make sure that it is worth their time and effort. Our consultants are already working for you, and this activity will help them improve. We have presented this service list to in order to develop a series of professional tools that will attract even more students and professionals in our network. When one of our consultants is performing a task or an experiment, he will publish it on this list, so they can be consulted by anyone. Here are some tools we want to use: Jira Software, a tool that improves the management of resources and work. It is a collaborative tool based on the concept of agile processes. Pinnacle Performance Management, a program developed by the U.S. Air Force to plan, execute, and control their key resources. The Art of Management, a reading material from management expert Peter Drucker. External links "Web Development and Software Creation" by John Oliver "Web development and software creation" is a simple and informative video that exposes the complexity and the technical
