What's New In AutoCAD?

Killed Features: The following

features are no longer available with AutoCAD or AutoCAD LT 2020: AutoCAD 2D cross-hatch Voxel Preview Refresh your drawing after each export (Excel, DWG, CSV) New Features: One of the most requested AutoCAD features is now available in AutoCAD LT and AutoCAD LT 2019: Markup Import. AutoCAD Markup Import lets you quickly import and review any text, numbers, line styles, and polyline symbols from any source, whether it is from a

spreadsheet, printout, or file, into a new drawing or template. With Markup Import, you can import text in any format, including typed, drawn, scanned, or scanned/typed, and review it in the same way as you would review a 2D drawing, including changes in multiple drawing views. Introducing: AutoCAD Connect! AutoCAD 2020 brings an exciting new feature to you: AutoCAD Connect. AutoCAD Connect enables you to connect your AutoCAD

drawings, models, and reports to services on the cloud. This new tool in the cloud will provide easy access to content stored in the cloud and save you time. See how AutoCAD can save you time and save your data with the new ECM Enhancements: AutoCAD LT 2020 brings several enhancements to the ECM (Electronic Communications Management) functionality in AutoCAD LT. This feature enables you to securely send

and receive drawings, models, and reports to and from other authorized users. With the ECM Enhancements, you can transmit or receive more than 2,000 files, receive and reply to emails, and send and receive files securely in a secure, two-step process. Refresh your drawing after each export (Excel, DWG, CSV) AutoCAD LT 2020 includes the ability to refresh your drawing after each export. You no longer have to re-export to a different format.

Just import your drawing with the Refresh Exports option and you'll see the changes reflected in the file. To ensure a smooth transition from your 2019 or older editions of AutoCAD, we are continuing to work with the original developers of AutoCAD and AutoCAD LT on critical stability improvements. AutoCAD LT 2020 will be backward compatible with AutoCAD LT 2019 and previous versions of AutoCAD
