In order to understand the relation between human MHC and the disease of cancers, we have been studying the gene for beta-2-microglobulin, which has a chaperon activity for immunogenic products of the class I MHC (H-2 complex). We have been elucidating the structure and the expression of the gene, and analyzing the functional consequences of various sequence variants in the gene. The gene for beta-2-microglobulin is divided 6d1f23a050
