You are not the owner of this software.Â .Q: Debian: get arch specific package source I like to figure out why the package a specific package isn't available for any of my architectures. How can I get the source for a package with a specific architecture? debian is best, but any solution is ok. A: You can use the dpkg-query tool which is installed by default on Debian. sudo dpkg-query -l '*#?architecture?*' It will list all installed packages as well as all non-installed packages 6d1f23a050
