It is really easy to use and you can also see the tutorial how to use it. How to Backup and Clone a Thumb Drive Chances are, sooner or later, you're going to want to do a backup or do a thumb drive clone. If you don't already have it, you need to download a program called Clonezilla. Free for personal use, Clonezilla can create a full clone of your drive, or you can take an existing one and make a smaller copy. It will also, with some tools, create an image of your Mac or Windows OSX system drive. You can then use this image to do a backup or restore the drive, or copy it to a USB stick for moving to other systems. Even better, you can also partition and clone entire storage media like an external drive. How to Create and Restore a Thumb Drive Image in Windows 7 Linux has a great tool called Clonezilla.
